The only platform that connects intelligence
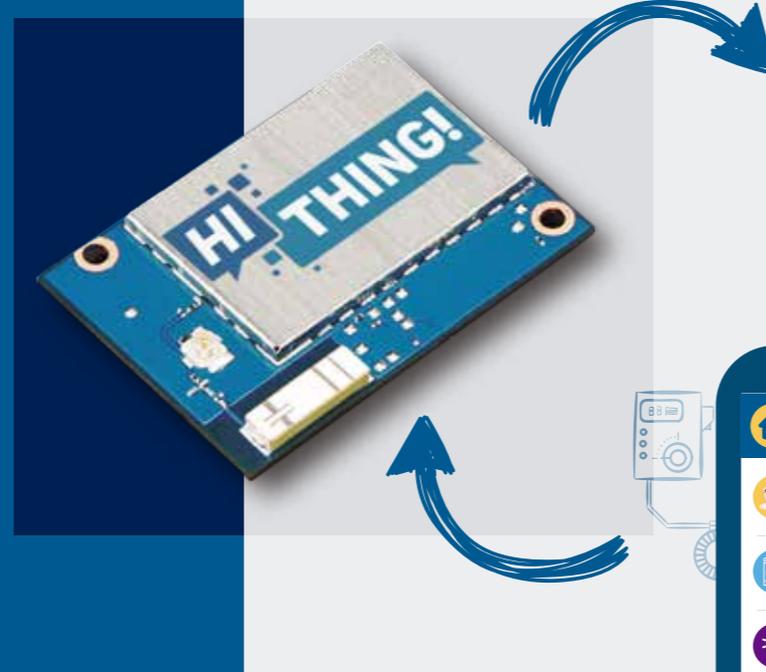

HI THING!

*SMART SOLUTIONS
FOR SMART PEOPLE*

HI THING!

Hi Hithing!, please increases production 30%

Ok, I'll let you know when i do it

PRO ASISTECH
SMART SOLUTIONS

Based on artificial intelligence, our cutting edge technology are some of the best on the market and can humanize machines, devices and things.

Intelligence that makes the things and machines around us almost human.

- Car

Coffee m...
- Do you have coffe and water?
- Of course!
- Make me an american coffe
- It´s ready

Car
- 2000 km remain for the next maintenance check, do you want me to make an appointment?
- Ok, when you know the date you point me in the agenda
- Tuesday, February 15 at 10:00

Barbara
- when you'll be back?
- Hi Dad, I'll be back at 14:00
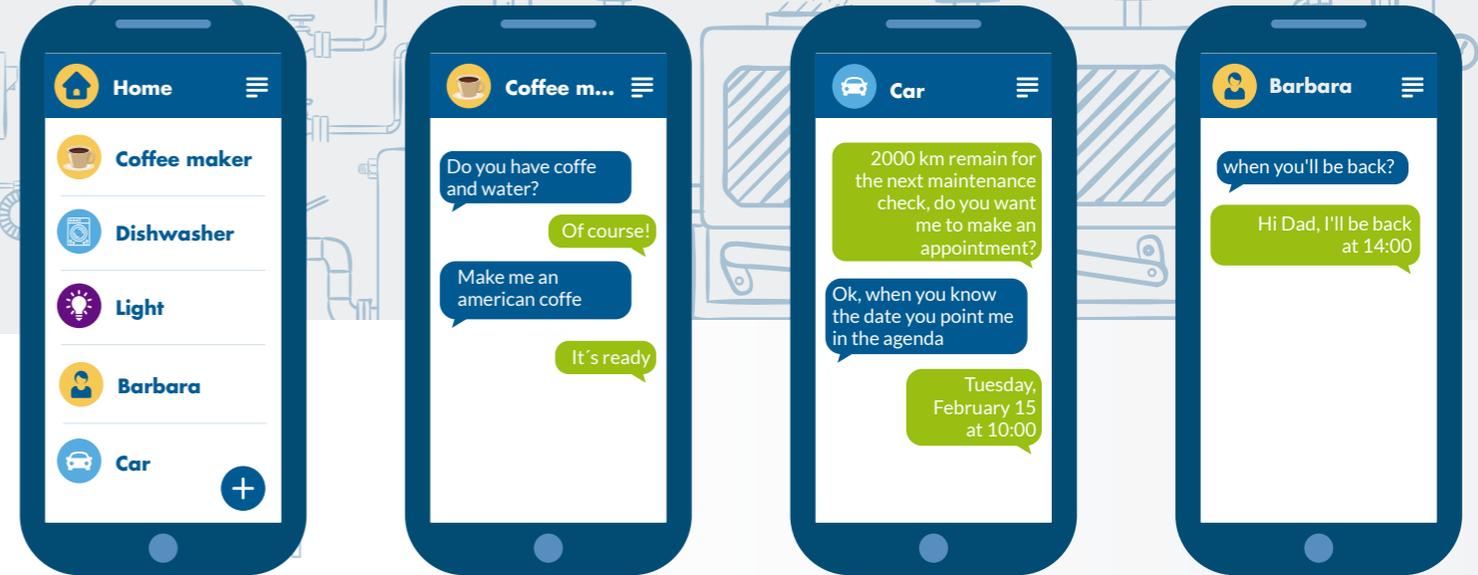

What is HITHING!

Have you ever had a device break down and didn't know what was wrong with it? Wouldn't you like to know why it broke down? What if it could tell you the state it's in, describe its problems or ask you about your preferences and needs at any time? **HITHING!** can humanize devices so that they can communicate with you and each other in a natural language. Now you no longer need to give predetermined commands to a device. Just tell it what you need and **HITHING!** will convert it to the device's natural language.

HITHING! is a global solution for a global world and allows devices to interact with you and each other without human intervention. Any type of human and non-human intelligence, algorithms, robots, things or machines of any nature or level, can communicate amongst themselves in natural language.

What does it consist of?

HITHING! is a platform with the format of a social network which connects people with artificial intelligence devices. It allows you to chat with things and allows things to chat with other things in natural language. We are world pioneers in this field and hold international patents to prove it.

By means of intelligence bots, things, machines and algorithms acquire their own personality which allows them to interact with people and each other in a natural language.

Who HiThing! is aimed at, its uses

We develop solutions for multiple applications in a wide range of different fields, from electrical appliances, home and well-being to the laboratory, industry, health, care of the elderly and/or disabled, and clinical equipment.
